

Bioethics in Canada, 2nd Edition

A Philosophical Introduction

Every day bioethical conflicts arise in Canadian hospitals and courtrooms; they are debated in newspaper columns and argued in private. This updated edition of *Bioethics in Canada* provides an accessible introduction to the philosophical, historical, and medical concepts shaping these contemporary, and very contentious, debates. *Bioethics in Canada* opens with an introduction to moral theory and bioethical principles. These theoretical conceptions are then applied to practical ethical conflicts involving abortion, distributive justice, genetics, reproductive technology, and other vital topics. A landmark case opens each chapter, illuminating the many issues involved in these debates, as well as the philosophical assumptions that shape them. This highly usable text features excerpts of significant bioethical writings, as well as recommended websites, suggestions for further reading, and original case studies for students to analyze. With new information on emerging topics such as transplant tourism and multicultural challenges in pluralistic societies; updated research, recommended reading lists, and web resources; and new cases of interest, this second edition will be a valuable resource for many classes in the disciplines of Philosophy, Health Studies, Medicine, and Nursing, providing a strong ethical foundation in a field whose technical frontiers are ever shifting.

Author Information

Carol Collier
Carol Collier is an Adjunct Professor of Philosophy at the University of Sudbury—Laurentian University.

Rachel Haliburton
Rachel Haliburton is an Associate Professor of Philosophy at the University of Sudbury—Laurentian University.

Reviews

"*Bioethics in Canada* is an extremely accessible introductory textbook—my students find it a pleasure to read. The authors provide a comprehensive overview of the main philosophical debates in bioethics. This is an excellent text that gives students a thorough understanding of the bioethical terrain in a Canadian context."—Meredith Schwartz, Department of Philosophy, Ryerson University

"Collier and Haliburton have done a Herculean task in this exploration of the ways modern medicine and bioethics are shaped by philosophical assumptions, values and social determinants. The subject matter of the chapters and the pedagogical format utilized by the authors provide a marvelous resource for bioethicists, medical and health care professionals, advanced undergraduate and graduate students, and other readers interested in gaining a clearly and well-written understanding of the theory and practice of bioethics in Canada, and internationally, today."—Gregory Walters, Faculty of Philosophy, St. Paul University

"*Bioethics in Canada* does an exceptional job of presenting a balanced perspective on many of the most challenging bioethical challenges facing Canadians today."—Jeremy Snyder, Faculty of Health Sciences, Simon Fraser University

Table of Contents

Each chapter also includes an introduction, a conclusion, cases of interest, case studies, a glossary, suggestions for further reading, and recommended websites.

Chapter 1: Ethical Theory
The Ultimate Case Study
Ethical Theories, Ethical Dilemmas, and the Case Study in Bioethics
Utilitarianism: Happiness, and the Greatest Good for the Greatest Number
Mill's Refinement of Utilitarian Theory
Kantianism: Is My Action Right or Wrong?
Strengths and Weaknesses of the Theory
Virtue Ethics: What Sort of Person Should I Be?
Strengths of the Theory
Weaknesses of the Theory
Feminist Approaches to Ethics
The Ethics of Care: From Psychology to Philosophy
Feminist Ethics
Philosophical Reflection on Religion and Ethics

Chapter 2: Distributive Justice
Landmark Case: Jacques Chaoulli
Methods for the Distribution of Health Care
Resources
Ethical Theory and Distributive Justice
Guidelines for Limiting Health Care
Distribution and Procedural Justice
Distributive Justice and Global Concerns
Philosophical Reflection on Thought Experiments, John Rawls, and Distributive Justice

Chapter 3: The Health Care Professional–Patient Relationship
Landmark Case: Scott Starson
The Goals of Medicine
Models of the Doctor–Patient Relationship
The Nurse–Patient Relationship: An Evolving Ethic
Autonomy: Theoretical Considerations
The Ethical Limits of Autonomy
Informed Consent: Strong and Weak Paternalism
Advance Directives
Feminist Challenges to the Autonomy-Based Concept of the Doctor–Patient Relationship
Autonomy and the Experience of Illness
Multicultural Challenges in Pluralistic Societies
Philosophical Reflection on the Concept of Autonomy and Modern Perspectives on Human Flourishing

Chapter 4: Medical Research
Landmark Case: Jesse Gelsinger
Historical Aspects: Uses and Abuses of Medical Research
The Goal of Medical Research: Healing or Knowledge?
Therapeutic Misconceptions
Informed Consent
Randomized Clinical Trials and the Use of Placebos
Conflict of Interest in Research: Does Bad Ethics Make Bad Science?
Research on Animals
Ethical Theory and Medical Research
Philosophical Reflection on Medical Research

Chapter 5: Reproductive Technologies
Landmark Case: Jaycee Buzzanca
The Rise of Reproductive Technologies
Infertility and the Desire to Have Children
Causes and Conceptions of Infertility
The Procreative Liberty Argument and the Harm Principle
Weaknesses of the Procreative Liberty Argument
Ethical Theory and Assisted Reproduction
Feminist Concerns about Assisted Reproductive Practices
Cross-Border Reproductive Care and the Baby Manji Case
Philosophical Reflection on Technology and Bioethics

Chapter 6: The Genetic Revolution
Landmark Case: Nancy Wexler
Conflicting Visions of the Future
Pre-symptomatic Testing and the Knowledge of Tiresias
Genetic Therapy
Prenatal Testing and Prenatal Decisions
Selective Abortion and the Spectrum of Conditions
Pre-implantation Testing and the Moral Status of the Human Embryo

and Abortion: Maternal-Fetal Conflicts or the Fetus as Patient: Philosophical Reflection on Life, Soul, and Body. Chapter 8: Death and Dying. Landmark Case: Hasan Rasouli: Historical and Philosophical Perspectives: Technology and the Meaning of Death: Killing and Letting Die: Euthanasia and Assisted Suicide: Medical Futility and Impaired Newborns: Ethical Theory and Death and Dying: Philosophical Reflection on Death and Dying. Chapter 9: Organs and Tissues: Procurement and Transplantation. Case Study: "Transplant Tourism": Historical and Philosophical Perspectives: Death, Brain Death, and Organ Transplantation: Controlling the Demand: Allocation Issues: Tissues and Genes as Property: Ethical Theory and Organ Transplantation: Philosophical Reflection on the Body-Machine. Chapter 10: Medical Paradigms and Non-Standard Treatment. Landmark Case: Tyrell Dueck: Concepts of Health and Illness: A Clash of Paradigms: What Is the Doctor to Do? The Normal and the Pathological: Resisting Normalization: Ethical Theory and Non-Standard Treatments: Philosophical Reflection: Morality and Health. Appendix: The Principles of Bioethics and Case Study Analysis Guidelines
