Bioethics in Canada, 2nd Edition
A Philosophical Introduction

Every day bioethical conflicts arise in Canadian hospitals and courtrooms; they are debated in newspaper columns and argued in private. This updated edition of Bioethics in Canada provides an accessible introduction to the philosophical, historical, and medical concepts shaping these contemporary, and very contentious, debates. Bioethics in Canada opens with an introduction to moral theory and bioethical principles. These theoretical conceptions are then applied to practical ethical conflicts involving abortion, distributive justice, genetics, reproductive technology, and other vital topics. A landmark case opens each chapter, illuminating the many issues involved in these debates, as well as the philosophical assumptions that shape them. This highly usable text features excerpts of significant bioethical writings, as well as recommended websites, suggestions for further reading, and original case studies for students to analyze. With new information on emerging topics such as transplant tourism and multicultural challenges in pluralistic societies; updated research, recommended reading lists, and web resources; and new cases of interest, this second edition will be a valuable resource for many classes in the disciplines of Philosophy, Health Studies, Medicine, and Nursing, providing a strong ethical foundation in a field whose technical frontiers are ever shifting.

Author Information
Carol Collier
Carol Collier is an Adjunct Professor of Philosophy at the University of Sudbury–Laurentian University.

Rachel Haliburton
Rachel Haliburton is an Associate Professor of Philosophy at the University of Sudbury–Laurentian University.

Reviews
"Bioethics in Canada is an extremely accessible introductory textbook—my students find it a pleasure to read. The authors provide a comprehensive overview of the main philosophical debates in bioethics. This is an excellent text that gives students a thorough understanding of the bioethical terrain in a Canadian context."—Meredith Schwartz, Department of Philosophy, Ryerson University.

"Collier and Haliburton have done a Herculean task in this exploration of the ways modern medicine and bioethics are shaped by philosophical assumptions, values and social determinants. The subject matter of the chapters and the pedagogical format utilized by the authors provide a marvelous resource for bioethicists, medical and health care professionals, advanced undergraduate and graduate students, and other readers interested in gaining a clearly and well-written understanding of the theory and practice of bioethics in Canada, and internationally, today."—Gregory Walters, Faculty of Philosophy, St. Paul University.

"Bioethics in Canada does an exceptional job of presenting a balanced perspective on many of the most challenging bioethical challenges facing Canadians today."—Jeremy Snyder, Faculty of Health Sciences, Simon Fraser University.

Table of Contents
- Each chapter also includes an introduction, a conclusion, cases of interest, case studies, a glossary, suggestions for further reading, and recommended websites.
- Chapter 1: Ethical Theory
  - The Ultimate Case Study: Ethical Theories, Ethical Dilemmas, and the Case Study in Bioethics
  - Utilitarianism: Happiness, and the Greatest Good for the Greatest Number
  - Mill’s Refinement of Utilitarianism
  - Kantianism: Is My Action Right or Wrong?
- Chapter 2: Distributive Justice
  - Landmark Case: Jacques Chaoulli Methods for the Distribution of Health Care Resources
  - Ethical Theory and Distributive Justice
  - Guidelines for Limiting Health Care Distribution
- Chapter 3: The Health Care Professional–Patient Relationship
  - Landmark Case: Scott Starson: The Goals of Medical Models of the Doctor-Patient Relationship
- Chapter 4: Medical Research
  - The Ethical Limits of Autonomy: Informed Consent
  - Strong and Weak Paternalism
  - Therapeutic Misconceptions
  - Advanced Directives
  - Familists: The Autism
  - Autonomy
- Chapter 5: Reproductive Technologies
  - Landmark Case: Jaycee Buzananza
  - The Rise of Reproductive Technologies
- Chapter 6: The Genetic Revolution
  - Landmark Case: Nancy Wexler
  - Conflicting Visions of the Future
- Chapter 7: Abortion and Maternal-Fetal
  - Landmark Case: Dr. Henry Morgentaler
  - Religious and Historical Perspectives
- Chapter 8: Genetically Modified Organisms
  - Landmark Case: Jesse Gelsinger
  - Philosophical Reflection on Eugenics
