

Feminist Food Studies

Intersectional Perspectives

This expansive collection enriches the field of food studies with a feminist intersectional perspective, addressing the impacts that race, ethnicity, class, and nationality have on nutritional customs, habits, and perspectives. Throughout the text, international scholars explore three areas in feminist food studies: the socio-cultural, the corporeal, and the material. The textbook's chapters intersect as they examine how food is linked to hegemony, identity, and tradition, while contributors offer diverse perspectives that stem from biology, museum studies, economics, popular culture, and history. This text's engaging writing style and timely subject-matter encourage student discussions and forward-looking analyses on the advancement of food studies. With a unique multidisciplinary and global perspective, this vital resource is well-suited to undergraduate students of food studies, nutrition, gender studies, sociology, and anthropology. **FEATURES**

- includes pedagogical features such as discussion questions and a glossary
- ensures a feminist intersectional approach to food studies to enhance, enliven, and advance food studies in innovative, creative, and radical ways

Author Information

Barbara Parker

****Barbara Parker**** is an Assistant Professor of Sociology at Lakehead University. She teaches in the areas of food, gender, and health; the sociology of nutrition; social justice; and qualitative research methods.

Jennifer Brady

****Jennifer Brady**** is an Assistant Professor of Applied Human Nutrition at Mount Saint Vincent University. She teaches courses on ecological perspectives of food; nutrition education in communities; and food, health, and social policy.

Elaine Power

****Elaine Power**** is an Associate Professor in the School of Kinesiology and Health Studies at Queen's University, where she teaches on topics such as food systems; critical weight studies; and qualitative research methods.

Susan Belyea

****Susan Belyea**** is the director of a women's centre at Queen's University and teaches courses on social and political responses to food insecurity and agriculture and the environment.

Reviews

"One of the major contributions of *Feminist Food Studies* is that it explores intersectionality through refined angles at both the theoretical and the empirical levels. In a clear and accessible manner, every chapter of the book experiments with moving intersectionality to 'unexplored places.' The result is a fascinating and enriching journey into feminist scholarship and its multiple connections with food."

—Dr. Carla Guerrón Montero, University of Delaware

"*Feminist Food Studies* assembles new scholarship on food and feminism. The collection takes up an intersectional lens that is well-defined in the introductory chapters for new readers. The authors pay homage to the anti-colonial and social justice roots of feminist food studies as a field, a commitment that is enacted and built upon in every chapter. Established scholars and new readers alike will find ideas to forage for that nourishes a critical feminist consciousness about food studies."

—Dr. Jennifer L. Johnson, Thorneloe University at Laurentian

Table of Contents

****Foreword****

Psyche Williams-Forsen

****Introduction: This Is What Feminist Food Studies Looks Like****

Barbara Parker, Jennifer Brady, Elaine Power, and Susan Belyea
