Language is the core of human culture - anthropologists have always put it at the centre of their agenda. So too have many linguists. The amalgam of the two disciplines, anthropological linguistics, aims to document and examine how language mirrors social structure and culture-specific thought patterns. *Language, Society, and Culture* provides a concrete method for studying the relation between language and society.

Intended for use in introductory-level courses in linguistics that adopt a cultural focus, this text is also suitable for supplementary use in more theoretical linguistics courses. Written in Danesi's accessible and engaging style, highlighting the fascinating and vital work going on in anthropological linguistics, this book will also appeal to a broad audience of language students, scholars, and enthusiasts.

Author Information

Marcel Danesi

Marcel Danesi is Professor of Semiotics and Linguistic Anthropology in the Department of Anthropology at the University of Toronto. His main research interests are semiotic theory and youth culture. He is currently Editor-in-Chief of *Semiotica*, the official journal of the International Association for Semiotic Studies.

Reviews
