Social Determinants of Health, Third Edition

Canadian Perspectives

In the current environment of deepening class and income inequality, it is essential to understand the socio-economic conditions that shape the health of individuals and communities. Now in its third edition, Dennis Raphael’s _Social Determinants of Health_ offers a comprehensive discussion of the primary factors that influence the health of Canada’s population. This seminal text on the social determinants of health contains contributions from top academics and high-profile experts from across the country. Taking a public policy approach, the authors in this edited collection critically analyze the structural inequalities embedded in our society and the socio-economic factors that affect health, including income, education, employment, housing, food security, gender, and race. The thorough updates to this edition include a greater focus on the political mechanisms that explain the distribution of the social determinants of health and additional material on public policy, early childhood education in Canada, and the determinants of Indigenous peoples’ health. Rich in pedagogical tools including critical thinking questions and lists of recommended readings and online resources, this book will actively engage students and researchers alike.

Author Information

Dennis Raphael

**Dennis Raphael** is a Professor of Health Policy and Management at York University, whose areas of interest include topics in public policy, poverty, and social determinants of health.

Reviews

“This book is a must-read for anyone in education, health, government, or policy development. I think it is crucial that more academics start including SDOH in courses across multiple disciplines. Many courses with an emphasis on health tend to focus on the individual and for the most part ignore the social factors—this needs to change. This text does an incredible job of outlining those social factors.”—_Anne-Marie Sullivan, School of Human Kinetics and Recreation, Memorial University of Newfoundland_

“This third edition of Raphael's Social Determinants of Health offers timely new material and remains the most compelling and exhaustive Canadian text available on the subject. No one weaves together a more impressive group of experts with more passion, urgency, and evidence than he does.”—_Kelly Anthony, Faculty of Applied Health Sciences, University of Waterloo_

“This book makes a highly significant contribution to the field of Public Health in Canada. Aside from being well-researched and well-written, a major strength of the book is its focus on identifying clear policy directions to improve the health of Canadians by influencing each of the social determinants. Raphael’s book is essential reading for university students, practitioners, program managers, and policy-makers in all of the human service sectors.”—_Benita Cohen, College of Nursing, University of Manitoba_

Table of Contents

Foreword to the Third Edition, _Michael Butler_ and _Maude Barlow_

Foreword to the Second Edition, _The Honourable Carolyn Bennett_

Foreword to the First Edition, _The Honourable Roy J. Romanow_
